SAT	WB6N	WB6N	KA7YYR

About Ground Hog Day

February 2 is the only day of the year when a rodent who lives in a town in Pennsylvania with an impossible-to-pronounce name is shaken awake at 6:30AM local time by men in weird get-up's including top hats and is called upon (in a local Pennsylvania Dutch dialect) to make a long-range *national* weather forecast. Let's hope that 02/02 is a cloudy day in Punxsutawney, Pennsylvania! And those of us who have birthdays on 02/02 get an awful lot of kidding.

Possible Change in Frequency for IMN

As propagation improves with the help of Sunspot Cycle 25, we are hearing more digital signals on 3572 Khz. That was annoying to your editor but after studying the 80 Meter band plan it is duly noted that the Digi portion of the band goes all the way down to 3560 Khz, so maybe the Digi stations are the offended parties. The IMN brain trust will investigate frequencies just below 3570 (because we know all IMN'ers have their antennas precisely tuned to 3572 and we don't want to cause a problem with that). After a research and discussion period we'll let you know the plan.

Sorry, no Bull or Humor this month (bah, humbug)

January QNI and QTC (30 OF 31 DAYS IN AT PRESS TIME)

QNI: VE6ADM-14, VE6AWI-25, K7BFL-9, WW6D-26, KA7FTP-23, W7GB-9, KJ7GNB-8, AI7H-25, K9JM-29, K7JV-14, WB6N-18, KF7NUN-11, W6PAP-2, KF7QNS-6, VA7QQ-18, WJ7S-17, KM7SM-22, K7TRT-5, K7URU-20, W5UYH-14, total QNI 309

QTC: AI7H-14, VA7QQ-6, KM7SM-4, WB6N-2, total QTC 26

Total Net Time: 274 Minutes (Average about 9 Min/Session)

Address Corrections

Let us know if you change your e-mail address, and / or if you don't wish to receive the IMN Newsletter any longer.
